Standard Production Line

Description: The moving gantry bead glue applicator has the capacity to cover 8' wide material of any length. The unit will automatically spread glue and apply a water mist. A stack of panels is assembled and pressed in the vacuum press.

Capabilities: In one cycle the line can produce 7 panels 8' wide x 24' long x 4.5" thick—or any combination of thicknesses up to a 35" high stack. Line can also be used to produce any other size of panels up to 8 x 24 feet.

Price includes:

- Moving Gantry Bead Glue Applicator
- Vacuum Press
- Installation
- Training

All prices are Canadian dollars, FOB our plant near Calgary, Alberta, Canada (net of all taxes and duties)

*The client is required to enter into licensing agreement with ECOPAN Corporation.

** The client is responsible for the traveling and accommodation expenses and any surcharge for different power requirements than in North America. (Canada and US only)
